

MD RIFAT AL JAYED UTSHO

FULL STACK DEVELOPER • MERN STACK SPECIALIST

Tongi, Gazipur, Bangladesh | zayedutsho@gmail.com
[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer specializing in the MERN stack and modern JavaScript/TypeScript ecosystems (React, Next.js, Node.js, Express, MongoDB, PostgreSQL, Supabase). Proven track record delivering production-grade web applications across healthcare, research, competitive-tech, and SaaS domains — from secure authentication systems and RESTful APIs to polished, responsive front-end experiences. Comfortable owning a project end-to-end: architecture, database design, deployment, and direct client communication. Currently leading technical delivery as a founder while contributing to international engineering teams remotely.

TECHNICAL SKILLS

Frontend

React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, DaisyUI, Flowbite, React Router, HTML5, CSS3

Database

MongoDB, Mongoose, PostgreSQL, MySQL, Supabase

Backend

Node.js, Express.js, NestJS, REST API Design, JWT & OAuth Authentication, Role-Based Access Control

Tools & Platforms

Git/GitHub, Docker, Vercel, Netlify, DigitalOcean, Firebase, Postman, Figma

WORK EXPERIENCE

Founder & Full Stack Developer | Scopioe

2025 — Present

- Founded and lead a web development agency delivering modern, production-ready web applications for international clients.
- Architect full-stack solutions end-to-end using React, Next.js, Node.js, Express, and MongoDB/PostgreSQL, balancing scalability with rapid delivery.
- Own client relationships from discovery to deployment — translating business requirements into technical specifications and realistic delivery timelines.
- Direct a small team of designers and developers, setting code-quality standards, conducting reviews, and managing sprint planning.

Software Engineer | Dowell Research Singapore (Remote)

2024 — 2025

- Developed and maintained internal platforms and client-facing web applications for an international research organization.
- Built responsive, accessible frontend interfaces in React, focusing on performance and cross-browser consistency.
- Integrated third-party and internal APIs, improving data flow reliability between services.
- Partnered with cross-functional, distributed teams to ship business-critical features on schedule.

Software Engineer | Imrans Lab (Remote)

2022 — 2023

- Built responsive web applications and reusable UI component libraries within MERN-based client projects.
- Contributed across the stack — frontend interfaces, REST API development, and relational/NoSQL database design.
- Diagnosed and resolved production bugs, collaborating closely with senior developers to maintain delivery schedules.

FEATURED PROJECTS

Spill Rx — Healthcare Community Platform

spill-rx.com

A full-stack healthcare community platform enabling users to anonymously share medication experiences, discuss treatments, and connect with others facing similar health challenges, built around a secure, privacy-first architecture.

- Secure user authentication, authorization, and role-based access control
- Anonymous posting and community discussion threads with real-time content interactions
- User profile and account management with healthcare/medication-focused communities
- Scalable PostgreSQL database architecture provisioned through Supabase
- Fully responsive design optimized for mobile and desktop

Technologies: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS, REST APIs, JWT/OAuth

Role: Developed and maintained the full-stack application; built responsive, accessible UIs in Next.js; designed and integrated PostgreSQL schemas via Supabase; implemented authentication and secure data handling; optimized performance and UX across devices.

Contest Arena — Competitive Programming Platform

contest-arena-ih.web.app

A contest management platform that lets users register for and participate in coding contests, track performance, and manage events from a single dashboard.

- User authentication and authorization with profile management
- End-to-end contest creation, registration, and real-time update workflows
- Responsive, mobile-friendly interface built for fast contest-day usage

Technologies: React.js, Firebase, Tailwind CSS, JavaScript

Role: Designed the contest registration and management flow, implemented Firebase authentication, and built the real-time update system for live contest tracking.

Fresh-Ness — Food & Inventory Management App

fresh-ness.vercel.app

A grocery and food management platform that helps households and small businesses track inventory, monitor expiry dates, and reduce food waste.

- Full inventory and product tracking with CRUD operations
- Expiry monitoring with at-a-glance, user-friendly dashboard
- Responsive UI built for everyday, fast data entry

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Role: Built the full MERN stack application, designed the MongoDB schema for inventory tracking, and implemented the expiry-monitoring dashboard logic.

EDUCATION

Bachelor of Science in Computer Science & Engineering

2022

American International University - Bangladesh (AIUB)

CORE COMPETENCIES

- | | |
|--|------------------------------------|
| • Full Stack Web Development | • RESTful API Design & Integration |
| • Database Design & Optimization | • Authentication & Authorization |
| • Figma-to-Code Implementation | • Deployment & DevOps Fundamentals |
| • Agile Development & Client Communication | • Performance Optimization |

LANGUAGES

Bengali (Native) • English (Professional Working Proficiency)
